Knox Capture
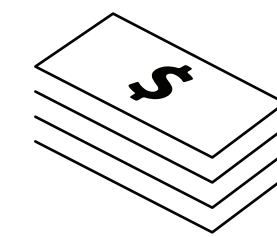

Enterprise-grade scanning on your Galaxy device

Galaxy devices with
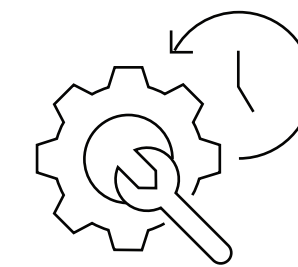

SΛMSUNG Knox Capture
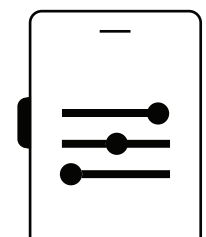

Knox Capture

One Device for What You Need

- Smartphone and scanner in one
- Easy to scan with Knox Capture app
- Enterprise-grade scanning performance
- Streamlined deployment
- Comprehensive management tools and support

Cost ⬇   **Productivity** ⬆   **UX** ⬆
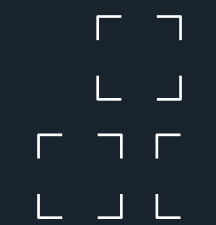

Solution availability may vary by country or model

For Frontline Workers

Quick and Easily Scan

**Quickly launch the scanner app**
Push the remapped hardware key or the
keyboard wedge to start scanning right away

Advanced scanning at your fingertips
Scan multiple targets in a single sequence with various
multi-scanning modes and advanced formatting

Short learning curve
Scan barcodes just like you would take pictures
with your smartphone

For IT Administrators

Effortlessly Deploy and Configure

Easily configure scanning settings
Download the Knox Capture app from Google Play
on the admin device to set up profiles

Tailor scan settings for each business app
Set up unique scanning configurations
for each application you use for work
- No need for integration between your work app and the SDK

Deploy in bulk over-the-air
Remotely install and configure Knox Capture app with
your own scanner configurations using your EMM/MDM

Supported barcode symbologies

Knox Capture supports most industry standard barcode types
