Samsung Unveils Galaxy TabPro S, 2-in-1 Tablet with Windows 10 Optimized for Productivity and the Best in Mobility

Galaxy TabPro S brings an all-purpose, seamless mobile station into one premium device

Lisbon, Portugal – February 20, 2016 – Samsung Electronics Co., Ltd., today announced Galaxy TabPro S, which combines Samsung's world-class technology, powered by the Microsoft Windows 10 operating system together into a premium tablet. By integrating the most popular features of laptops and tablets, users now have access to full notebook PC functionality in a lightweight tablet for the most productive mobile experience, even on-the-go.

"Galaxy TabPro S combines the best of both worlds by offering the simplicity of a tablet, with the functionality of a notebook. Partnering with Microsoft was a clear choice when developing the Galaxy TabPro S. It delivers the next stage in mobile productivity by incorporating Windows 10, and leveraging the enormous network of Windows developers," said Abdo Chlala, Head of IT & Mobile Business at Samsung Middle East & North Africa. "We're thrilled to deliver a seamless mobile station designed for all purposes, to our customers in the region."

High Productivity in a Sleek, Portable Design

Galaxy TabPro S caters to high-efficiency users seeking to maximize their productivity at home, in the office, or on-the-go. The tablet delivers full PC functionality with both Windows 10 Home or Windows 10 Pro for business, so that consumers and business users alike can enjoy all the features and functionality of the Windows 10 operating system, as well as compatibility with their existing IT infrastructure.

At 6.3 millimeters thin and weighing only 693 grams, Galaxy TabPro S is designed to be easily carried around all day. A full-sized keyboard cover, which comes included with the device, also enhances the usability. The keyboard's flexible hinge enables optimal, dual-angle viewing for the clearest display in any circumstance. Moreover, the Pogo pin on the Galaxy TabPro S keyboard eliminates the need for pairing or charging separately. The keyboard's touchpad emulates that of a PC to provide easy control, even when used in Stand Mode.

Superior Viewing Experience

Delivering the very first Super AMOLED display for Windows to the market, Galaxy TabPro S features a multitouch screen and a deeper color contrast with 94 percent natural tones to show true-to-life colors and more precise details for a best-in-class viewing experience. The lightweight, power-efficient 12-inch AMOLED display enables users to enjoy gaming, movies and other popular entertainment with unprecedented clarity and color accuracy.

Powerful Performance

Galaxy TabPro S delivers Samsung's advanced technology to maximize performance and power efficiency. It is the first tablet, powered by Windows, to support LTE Cat 6 for the fastest and most advanced connected experience. With enhanced fast charging features, Galaxy TabPro S battery can be fully charged in just 2.5 hours, and offers up to 10.5 hours of battery life* for all day use. For power-driven performance, Galaxy TabPro S is equipped with the latest generation Intel Core M processor, designed for a fanless 2-in-1 tablet, featuring only 4.5W of power consumption to eliminate noise disruption and maximize efficiency.

To enhance productivity, a multi-port adapter (HDMI, USB Type A & C) and Bluetooth Pen are available for purchase separately.

Galaxy TabPro S will be available in selected markets in the Middle East and North Africa from March 2016.
