Samsung Pay Expands with Addition of Wells Fargo

After five months on the market, 70 major banks and credit unions support Samsung Pay in the US

NEW YORK – March 1, 2016 – Samsung Electronics Co., Ltd. announced that, beginning today, Samsung Pay—the most widely accepted mobile payment system—will now support eligible Wells Fargo credit and debit cards. With the addition of Wells Fargo, Samsung Pay now supports eligible credit and debit cards from 70 banks and credit unions, covering over 70 percent of the US credit and debit card market.

“I am delighted to have Wells Fargo on board with Samsung Pay and that our users can now enjoy more choices in debit and credit cards,” said Injong Rhee, Head of R&D, Software and Services, Samsung Electronics Mobile Division. “Samsung Pay is gaining its momentum in customer adoption, and we will continue to expand the list of issuers. I look forward to offering many compelling mobile payment services to our joint customers together with Wells Fargo.”

“We are pleased today to announce that Samsung Pay is available for Wells Fargo customers,” said Jim Smith, head of Virtual Channels for Wells Fargo. “Innovations like Samsung Pay further our commitment to giving our customers the ability to make payments anytime and anywhere, including from a mobile wallet.”

Samsung Pay announced last week that about five million registered users processed over 500 million dollars in the first six months, showing a strong adoption rate in South Korea and the U.S.* This also demonstrates the increasing use of Samsung Pay for its convenience, flexibility and security.

Samsung Pay supports all major payment networks and many of the country’s major banks. It continues to expand its partnership ecosystem. [Click here](#) for the full list of financial partners that support Samsung Pay.

- **SIMPLE:** To make a payment on Samsung Pay, users can simply swipe up, scan their fingerprint and pay.
- **SAFE:** Samsung Pay uses tokenization, Samsung KNOX, and fingerprint authentication to provide secure payments. And, as terminals are upgraded to EMV, that security is leveraged, too.
- **ALMOST ANYWHERE**:** Samsung Pay is compatible with the majority of existing and new terminals, including most magnetic stripe, EMV and NFC terminals. That means Samsung Pay works at more places than any other mobile payment service.

About Samsung Pay

Samsung Pay, a mobile payment service from Samsung Electronics, is simple, safe and available almost anywhere you can swipe or tap your card. Combining NFC with Samsung’s proprietary MST technologies, Samsung Pay provides consumers a way to pay at millions of merchant locations. Samsung continues to strategically expand its partnership ecosystem for Samsung Pay to provide greater flexibility, access, and choice for customers while enabling an easy and safe payment experience.

**Samsung Pay launched in August 2015 in South Korea and in September 2015 in the U.S. market.*

***Samsung Pay is compatible with select cards, Samsung devices, and leading wireless providers. Visit www.samsung.com/pay to learn more. Some card reader terminals may require software updates to be compatible with Samsung Pay.*
